

CitySkid - Jaw Crushers

The CitySkid is delivered as a skidmobile container crusher to every jobsite. You can choose between the V3 with an electric drive or a V4 with a diesel generator fitted. In addition, the switchboard allows to control 2 further types of machinery. The Cityequip range offers several versions of the CitySkid to the following:

Single Toggle Jaw Crusher CitySkid 7V3/7V4 ST (700 x 500)

Info: The 700x500mm single toggle jaw crusher can be fed by a wheel loader or an excavator. A smart constructed feed opening ensures a failure free processing of oversize and finest grain. Through the 800mm wide discharge conveyor, the grading is getting piled.

Single Toggle Jaw Crusher CitySkid 9V3/9V4 ST (920 x 250)

Info: The 920x250 single toggle jaw crusher is able to crush sizes until 250mm to a 0-32mm final product without using a screening plant. This type of CitySkid replaces several of plant combinations as e.g. cone crusher and jaw crusher. The machine is automatically controlled with a filling sensor behind a pre-screener or through the feeding of a wheel loader.
