

AP Series Horizontal Shaft Impact Crushers

Available in both Primary (APP) and Secondary (APS) configurations, our horizontal shaft impact crushers offer many standard user-friendly features including:

- Hydraulic adjustment on primary and secondary curtains
- Fixed or gravity blow bar retention system
- Two, three or four row SOLID rotor designs
- Cast or fabricated/lined curtains
- Oversize bearings and shafts

These impactors continue to offer what many competing machines lack - mass and steel. We remain committed to the use of heavy gauge materials in these rugged, reliable machines.
